Infant Research Study
Measuring Everyday Experiences of Infants at Risk for Cerebral Palsy
Participate from home!

PURPOSE: To learn about infants' experiences in their everyday environments

WHAT IS INVOLVED: Children will wear a special outfit that measures what they see and do throughout a typical day at home.

WHO CAN PARTICIPATE: Children between 6-18 months of age with delayed motor skills, brain injury, or risk for cerebral palsy

COMPENSATION: Families will receive $50 for one day of participation.
